HONOR ROLL
YEARS
ON THE LIST

Dr. Uram | 5

Martin Uram, MD, MPH

Highly respected in his field for inventing technology that commercialized endoscopic eye surgery, Dr. Martin Uram treats macular degeneration, retinal detachments, diabetic eye disease and advanced glaucoma that requires surgery.

"People from around the world come to our offices to receive care for those specific issues," says Dr. Uram, who practices with partner Dr. Rupan Trikha and Drs. Chirag Patel and Sharmila Srinivasan. A frequent speaker at major academic meetings, Dr. Uram has also written a best selling medical book titled *Endoscopic Surgery in Ophthalmology*.

After training at Wills Eye Hospital in Philadelphia, Dr. Uram started the first retina-only surgery center in the United States, located adjacent to his office in Little Silver. "Technology has really changed the landscape of diagnosis and treatment," he says. "We are one of the only retina practices in the country with the

capability to supply top-end technology, medical management, clinical trials and surgery in our own surgery center." Equally important is the exceptional camaraderie among the doctors and staff. "We have a very happy atmosphere," says Dr. Uram. "I see patients every day who tell me how much they like coming in because everyone is smiling."

HOSPITAL AFFILIATIONS: Riverview Medical Center, Red Bank; Monmouth Medical Center, Long Branch; Manhattan Eye, Ear and Throat Hospital, New York City; Ocean Regional Eye Surgery Center, Toms River; Retina Consultants Surgery Center, Little Silver.
MEDICAL TRAINING: Wills Eye Hospital (residency); Manhattan Eye, Ear and Throat Hospital (macula and retina surgery fellowships).
